8+ Years Quality Leadership | 8+ QA Personnel Led | 4+ OEM / Tier 1 Programs

20+ Workflows Digitalized | Scrap ≈ 0.3% of Sales

SUMMARY

Quality Assurance Manager with 8+ years leading QMS, supplier quality, and customer quality in high-precision, regulated, zero-defect Tier 1 automotive manufacturing. Implemented a plant-wide IATF 16949 / ISO 9001 quality system (Stage 1 certification, no show-stoppers), drove scrap to 0.3% of sales while maintaining top-tier customer scorecard status, and served as supplier point of contact in a federally documented NHTSA safety recall response. Brings APQP/PPAP, FMEA, and data-driven quality leadership — including SQL/EQMS digitalization that eliminated roughly 1,000 man-hours a year of manual reporting — to mission-critical manufacturing.

SKILLS

- **Quality Systems & Standards:** ISO 9001, IATF 16949, APQP/PPAP, PFMEA, Control Plans, MSA, SPC
- **Problem Solving:** 8D, 5 Why, Root Cause Analysis, CAPA, SCAR management
- **Supplier & Customer Quality:** supplier audits & scorecards, supplier development, escalation management, field quality
- **Data & Digital:** SQL dashboards, SoftExpert EQMS, 20+ digitalized workflows, statistical analysis
- **Leadership:** 8+ person QA team across 2 shifts, cross-functional teams, OEM customer liaison

SELECTED CAREER IMPACT

- **IATF 16949 QMS Implementation & Certification —** Led plant-wide IATF 16949 implementation, translating standard and customer-specific requirements into procedures, controls, audits, management review, and shop-floor execution; completed Stage 1 with no show-stoppers and led Stage 2 certification preparation.
- **Scrap Reduction —** Drove cross-functional defect-prevention, containment, corrective-action, and process-improvement actions that reduced scrap to approximately 0.3% of sales.
- **Major Safety Recall Leadership —** As Quality Manager and supplier point of contact documented in Nissan's 2024 NHTSA Frontier recall response, coordinated traceability, containment, technical investigation, customer communication, and corrective-action verification.
- **Digital Quality Transformation —** Digitalized 20+ workflows and centralized quality data, audit evidence, inspection records, and action tracking in SoftExpert EQMS; built SQL-driven dashboards and scheduled JasperReports for KPI visibility.

PROFESSIONAL EXPERIENCE

YOROZU AUTOMOTIVE ALABAMA | Jasper, Alabama

Quality Assurance Manager Sep 2021 – Present

- Lead plant QA/QMS across 4+ major automotive programs — end-to-end inspection, metrology, lab validation, product release, and new product introduction (NPI) quality planning; chair cross-functional quality meetings and shift-start reviews.
- Direct 8+ QA engineers, technicians, and lab personnel across 2 shifts: staffing, training, competency development, inspection coverage, escalation, and accountability.

- Own customer quality for Nissan, Honda, Toyota, Mercedes-Benz/ZF: complaints, scorecards, containment, controlled shipping, 8D/CAPA, and executive communication.
- Lead IATF 16949 / ISO 9001 QMS implementation through Stage 1/Stage 2: procedures, audits, management review, document control, corrective-action systems, and shop-floor controls.
- Own APQP, PPAP, PFMEA, control plans, MSA / Gage R&R, SPC / Cp/Cpk, calibration, layered process audits, 4M change control, MRN disposition, and permanent countermeasures.
- Drive supplier quality: incoming-quality performance, escalation, containment verification, supplier corrective action (SCAR) follow-up, supplier audits; monitor PPM, defect trends, and action aging.

YOROZU AUTOMOTIVE ALABAMA | Jasper, Alabama

Quality Assurance Supervisor Jan 2021 – Sep 2021

- Supervised daily QA operations across shifts: inspection, lab/metrology, containment, customer response, and shift-to-shift communication.
- Coached QA personnel on drawings, defect evaluation, inspection methods, and problem solving; managed coverage, workload, and escalation.
- Reviewed alerts, MRNs, audit findings, capability studies, calibration, and corrective-action evidence for timely closure; improved electronic reporting and KPI tracking.

YOROZU AUTOMOTIVE ALABAMA | Jasper, Alabama

Quality Assurance Engineer Dec 2018 – Jan 2021

- Managed customer quality: PPAP submissions, capability analysis, quality alerts, nonconformances, containment, and corrective actions.
- Created inspection standards, check sheets, sampling methods, and reaction plans; performed process, product, layout, and compliance audits.
- Planned MSA / Gage R&R studies, evaluated Cp/Cpk data, investigated supplier/production concerns, and drove material-review actions to verified closure.

NISSAN MOTOR CORPORATION | Smyrna, Tennessee

Supplier Parts Inspection Technician – PQA/PQE Oct 2017 – Dec 2018

- First-level supplier quality support plant-wide: inspected suspect parts, verified drawing/spec compliance, and blocked nonconforming parts from vehicle assembly.
- Investigated supplier defects and supported root-cause analysis, containment, and corrective action; wrote sorting instructions and trained inspectors.

DIGITAL TRANSFORMATION & DATA SYSTEMS

- Centralized quality data, forms, audit evidence, inspection records, and action tracking in SoftExpert EQMS — 20+ digitalized workflows including LPAs, audits, inspections, CAPA tracking, and passdowns.
- Digitalized KPI reporting with SQL dashboards, SoftExpert analytics, and JasperReports covering dimensional trends, inspection completion, audit status, calibration, and management-review KPIs.
- Built quality apps and database tools (SQL, Excel/VBA, Access, SSRS, PHP/MySQL/PostgreSQL); automated reports and KPI calculations, saving roughly 1,000 man-hours a year; embedded AI-assisted analysis to accelerate decisions.

EDUCATION & TRAINING

Master of Science, Engineering / Industrial Management — Trine University, Angola, Indiana | 2016

Bachelor of Technology, Civil Engineering — Jawaharlal Nehru Technological University | 2015

Professional Training: PPAP & APQP • AutoCAD • SolidWorks

Certifications: Six Sigma Green Belt

Languages: English • Telugu • Hindi
